

NORDIC COUNTRIES' SUPPORT TO UKRAINE (EUR BILLION)* AFTER 24.02.2022

Nordic countries have strongly condemned Russia's aggression and provided **more than EUR 12 billion** in aid to Ukraine after the full-scale invasion. A significant portion — over 75% — is allocated to military aid. In terms of GDP percentage, Denmark leads with 1.29% in support, while Sweden and Iceland trail behind at up to 0.50% of GDP each**.

In 2023 **the amount of support has tripled** that of the preceding year. The composition of it has also changed significantly: from predominantly equipment and ammunition to combat vehicles and heavy weapons.

■ Military aid ■ Humanitarian and civilian aid

*Capturing bilateral support provided up to January 2024, this infographic offers a snapshot of official aid data, excluding support via the EU and forthcoming commitments (for example Norway's multi-year support program for Ukraine, totaling its support at EUR 7.5 billion by 2027, which makes it one of the top countries supporting Ukraine)***.*

Military aid: over EUR 9 billion

Arms and equipment: winter equipment, helmets, bulletproof vests, ammunition, anti-tank missiles, combat vehicles, tanks, air defense systems, artillery pieces (Archer), NASAMS, F-16 fighter jets for training purposes etc.

Financial support via funds (e.g. International Fund for Ukraine).

Training activities.

Humanitarian aid: approx. EUR 3 billion

Humanitarian and civilian support: medical supplies, generators, vehicles, food, and other essential items via primarily international humanitarian organizations.

Reconstruction and reform support: reconstruction of destroyed infrastructure, water, heating, energy supply, and mine clearance. Denmark took on a special role in the reconstruction of the city of Mykolaiv and Sweden has also adopted Strategy for Sweden's recovery and reform cooperation with Ukraine 2023–2027.

Financial aid and investments: support government institutions including salaries for teachers, health care workers and pensions, investments in the energy sector, and agriculture.

*Figures in EUR are approximate and subject to currency fluctuations.

**The total aid from February 2022 to January 2024 is assessed relative to the GDP of a single year.

***Including some support to Moldova and other countries in the region that have been affected by the war.
